

Omicron Lite & O-PHOS USER GUIDE

OMICRON LITE & O-PHOS USER GUIDE

The Omicron Lite and O-PHOS vaporizers are the industrys leading, non-flame powered portable extract vaporizers. The originals to use pure extract oils with no need for carrier agents or cotton. The ceramic cartridges are an advanced design, that provide voluminous vapor clouds while using very little of your extract oils.

INCLUDED IN YOUR KIT

- 1 x Omicron Lite or O-PHOS Vaporizer
- 1 x USB Charging Cable
- 1 x 2.0 Ohm KISS Cartridge
- 1 x Omicron Lite/O-PHOS Rugged Carrying Case

SPECS

- Output voltage = the internal battery voltage
- Input voltage: 3.0V – 4.2V
- Output current: 0A – 3.5A
- Quiescent current: <10uA
- Short-circuit protection current: <20mA LED will blink 3 times
- Reverse Current Protection
- Low Voltage Warning, light will blink 3 times when the cell (battery) voltage is under 3.0v
- Durable connector

OMICRON LITE & O-PHOS SAFETY LOCKOUT

To toggle the lockout feature of the power button on your Omicron Lite/O-PHOS, quickly press the power button 5 times within 3 seconds until the blue light flashes 3 times. To test the current on/off state, just press the power button once. If the blue light comes on the lockout is deactivated. The safety lockout feature is great to prevent your Omicron Lite/O-PHOS from accidentally turning on.

CHARGING INSTRUCTIONS

Omicron Lite/O-PHOS use a USB pass-thru charging system. This allows them to be used while charging. The Omicron Lite/O-PHOS is always powered by its built in lithium ion cell, even while connected to the USB charger.

- 1.** Unscrew the Omicron Lite/O-PHOS base cap by turning it counter clockwise.

- 2.** Plug the USB cable into the USB port on the bottom of the Omicron Lite/O-PHOS.

3.

Bottom of Omicron Lite/O-PHOS

No Red Light on means
Omicron Lite/O-PHOS is
not charging or is already
charged

Red Light on means
Omicron Lite/O-PHOS
is charging

KISS CARTRIDGE FILLING INSTRUCTIONS

- KISS cartridges work best with stable concentrates, solid or thick and not runny at room temperature
- Non metallic applicator recommended to avoid damage to the heating coil during concentrate application
- Avoid getting concentrates on any threaded areas

- 1.** Pull mouthpiece away from KISS cartridge main body and unscrew mouthpiece holder from KISS cartridge main body by turning mouthpiece holder counter clockwise.

OMICRON LITE & O-PHOS USER GUIDE

KISS CARTRIDGE FILLING INSTRUCTIONS

- 2.** Load 0.1 - 0.3 grams of concentrate by dropping on to heater coil or gently apply concentrate using a non metallic applicator.

Top Down View

WARNING!! Do Not touch the heating coils with a metallic applicator or damage may result.

KISS CARTRIDGE FILLING INSTRUCTIONS

- 3.** Screw mouthpiece holder back on to KISS cartridge main body by turning mouthpiece holder clockwise. Re-insert mouthpiece into mouthpiece holder.

OMICRON LITE & O-PHOS USER GUIDE

KISS CARTRIDGE FILLING INSTRUCTIONS

- 4.** Screw KISS cartridge onto Omicron Lite/O-PHOS in a clockwise direction.

OMICRON LITE & O-PHOS USER GUIDE

KISS CARTRIDGE USE

* PRO TIP

Keep cartridge standing upright when warm and keep pulling air through it to cool it down faster.

- Prerequisites:
- Omicron Lite/O-PHOS
 - KISS Cartridge already filled with no less than 0.1 grams and no more than 0.3 grams of extract and attached to your Omicron Lite/O-PHOS

- 1.** *Using your lungs, slowly inhale while holding down the power button for no longer than 5 seconds at a time.*
For maximum cartridge life expectancy, wait 20 seconds to allow coil to cool between hits and never run coil dry.

Always allow the cartridge to cool between hits.

!!WARNING!! Cartridge is HOT during use, avoid touching it.

MAINTENANCE INSTRUCTIONS

Your Omicron Lite/O-PHOS Vaporizer has been designed to be easy to care for and maintain.

By following these simple maintenance steps, you will keep your Omicron Lite/O-PHOS Vaporizer performing at peak performance.

Depending on your frequency of usage, the electrical contact points should be cleaned at least once every 3 - 7 days. The Omicron Lite/O-PHOS vaporizer uses relatively low voltage to operate and even a small amount of residue on the contact points and/or threads can reduce the voltage flow, impeding the performance of your Omicron Lite/O-PHOS. **Any residue bridging the gap between the threads and center post on your Omicron Lite/O-PHOS, could cause a very dangerous electrical short resulting in physical injury to yourself and damage to the battery and/or your Omicron Lite/O-PHOS Keep It Clean !**

- A. To clean the electrical contact points and threads, take a cotton swab (Q-Tip) and dip one end into some Isopropyl Alcohol (ISO). The higher percentage of purity, the better, try to use as close to 99% ISO as you can.
- B. Using the ISO dampened end of the cotton swab, gently scrub and clean any residue from all the contact surfaces and threads on all your **cartridges and Omicron Lite/O-PHOS**. The contact surfaces are all the areas that make contact with each other when a cartridge is screwed into the Omicron Lite/O-PHOS.
- C. Once cleaned, use the dry end of the cotton swab to help the drying process by gently running it over the areas just cleaned. Be careful that no cotton gets left behind on any surfaces or threads.

After every thing is completely dry, lightly touch the contact areas and threads with your fingers. If you feel any tacky areas, please repeat the cleaning procedure steps A - C again until all the contact areas and threads are tack free.

- DO:** Use ISO to clean the contact areas and threads on all your cartridges
- DO:** Use ISO to clean the contact areas and threads on your Omicron Lite/O-PHOS
- DO:** Keep your Lithium Ion battery in the Omicron Lite/O-PHOS charged and in good physical condition
- DON'T:** Submerge your cartridge, Omicron Lite/O-PHOS, USB cable or charger in any liquid
- DON'T:** Try to clean out a cartridge by filling it with ISO
- DON'T:** Leave behind any lint or cotton on the cleaned surfaces or threads
- DON'T:** Screw a cartridge on to the Omicron Lite/O-PHOS with out cleaning both first
- DON'T:** Use a longer or different USB cable than the one supplied
- AVOID:** Using cartridges that have had their coils damaged and/or thin oil put in them, causing them to leak.

FAQ's

Q. What are the DO's and DON'T's?

- A.** **DO:** Check your Omicron/O-PHOS for physical damage such as damaged buttons before use
DO: Pull air through the cartridge SLOWLY
DON'T: Blow air into the cartridge
DON'T: Get any oils, waxes etc. on to the threads during filling
DON'T: Excessively heat the KISS cartridge by holding the power button for more than 5 seconds
DON'T: Inhale hard, you will suck extract into the mouthpiece
AVOID: Extract oils that are too thin or runny at room temperature, or poorly processed / purged

Q. Will the KISS cartridges fit other ecig batteries?

- A.** The refillable Pure KISS Extract cartridges were specifically designed for the Omicron, Omicron v2, v2.5, Persei, Omicron Lite and O-PHOS only.

Q. What types of essential oils can I use?

- A.** Any essential oil that will liquefy with heat and thicken at room temperature that contains minimal plant material. There should be minimal amounts of plant material left in the extract i.e. earwax, putty, shatter, CO₂, nitro etc.

Q. My cartridge is leaking, what can I do?

- A.** The most common reasons for leaking cartridges are:
- Overheating the cartridge by holding the power button for more than 5 seconds
 - Blowing air into the cartridge
 - Inhaling too hard, try sucking slowly and lightly
 - Over filling the cartridge, 0.3 grams is the maximum capacity
 - Using oil that is too thin or low quality / poorly processed / purged will leak

Q. I hear bubbling sounds when I inhale, is this normal?

- A.** No, bubbling is caused by extract that is too thin at room temperature and/or has impurities in it from not being processed / purged correctly. These extracts are not recommended and will cause your cartridge to clog, leak and generally under perform.

Q. My cartridge is defective, what can I do?

- A.** We recommend to test every cartridge before use by connecting it to the Omicron Lite/O-PHOS **before** filling it with extracts. You can hold down the power button while looking at the coil in a dark area. You should see the coil start to glow, let go of the power button immediately to avoid damaging your KISS cartridge.
There are no refunds or exchanges on cartridges for hygienic reasons other than DOA if reported within 24 hours of receipt.

OMICRON LITE & O-PHOS USER GUIDE

FAQ's

Q. How long does a KISS cartridge last?

A. They will last a variable amount of time based on many factors. Battery voltage level, amount of time power button is held down for, material being vaporized, amount of cooling time between hits etc.

Q. How long does the battery last?

A. The battery is guaranteed for 14 days and a fully charged battery will last for about 200 4 second hits. Our duration is a conservative figure, based on half of the calculated number. The calculation you can use to estimate your number of hits based on your hit length is:
*A 3.7 V battery and a 2.0 ohm cart will draw about 1.85 amps of current. ($I=V/R$)
So a 1000 mAh battery will last about 0.65 hr (1.0 amp-hr/1.85 amps) or about 32 minutes of use.*
2 second hits = 960 hits
3 second hits = 640 hits
4 second hits = 480 hits

Q. How long does the battery take to charge?

A. The answer to this depends on the remaining charge still left in your battery and which battery type you are charging. For an empty battery to fully charge requires approx. 3.5 hours. When in charging mode, the light on the Omicron Lite/O-PHOS base will be solid **Red** and once charging has completed the light will turn off.

Q. My blue light flashes as soon as I press the button, what is causing this?

A. If the blue light flashes as soon as you press the button, that is either the low battery warning signal or a short condition somewhere. If your battery is depleted, charge your Omicron Lite/O-PHOS immediately and fully charge it before using it again. If the blue light continues to flash with a fully charged battery, please contact support.

Q. How long is the warranty on the Omicron Lite/O-PHOS?

A. The Omicron Lite/O-PHOS has a one year Warranty against manufacturer defects. The charger is guaranteed for 30 days and batteries for 14 days. Your invoice from an authorized dealer is needed for any warranty claims.

Any vaporizer unit or attachment bought from any auction site such as eBay, Amazon etc. or sites that undercut the manufacturers MSRP will not have a warranty.
